Swag Labs

Test Plan

Objective

In this test plan I will define the Scopes, Types of Testing, Test Environment, Test Data, Test Cases and Risk Assessment for the website https://www.saucedemo.com.

Scope of Testing

- **User Authentication:**Validating user authentication such as user login, credential handling (valid, invalid) and input field error message.
- **Product section:** Functional testing of will products catalogue and sorting filters.
- **Cart management:** Real-time cart state update testing.
- **Social links:** Functional validation of the links of the social media.
- **Static Content Verification:** Validating whether there are proper contents in the about section.
- **Dynamic Catalog section:** Validating if the section is showing proper content or not.
- **Checkout section:** Validating if the checkout is showing the correct product with the correct user information.

Types of Testing

- **Functional Testing:**
  - **Login section:** Verify if the platform allows when the password is correct and what it prevents when it's wrong.
  - **Add to Cart:** Verify if the add to cart button perfectly adds the right product or not.
  - **Sorting filter:** Verify if the sorting filter is working as intended or not.
  - **Logout button:** Verify if the logout button is logout the user or not.
  - **Input fields:** Verify if the users can insert their informations in the required input fields
  - **Cart management:** Verify if the users can add or remove the products from cart.
  - **Session management:** Verify the state of the cart and session persistence between different users.

- **UI Testing:**
    - **Error messages:** Verify if the display error messages are showing meaningful messages during login and other input fields
    - **UI elements:** Verify if the UI elements are in the correct position.
    - **Products picture:** Verify if the UI displays the accurate posters for the picture.
    - **Duplicate products:** Verify the users do not see duplicate products in any section.

- **Negative Testing:**
    - **Negative value:** Verify the login sections and reject the login sections and other input fields.

- **Edge cases:**
    - **Session management:** Verify the state of the cart and session persistence between different users.
    - **Add to Cart:** Verify if the add to cart button perfectly adds the right product for all users

Test Environment

- **Browser:**
    a. Brave on PC
    b. Samsung Internet on Android

- **Device:**
    a. PC
    b. Android

Test Data

- Usernames credentials are provided into the website:
    - standard_user
    - locked_out_user
    - problem_user
    - performance_glitch_user
    - error_user
    - visual_user

- Password is provided in the website:
    - secret_sauce

Test Cases

TC_ID	Module/ Feature	Type of Testing	Test Summary	Reproducing	Test Data	Expected Result	Actual Result
TC_01	Login	Functional	Verify if the login is successful with provided credential	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button	**Usernames**: standard_user, problem_user, performance_ glitch_user, error_user, visual_user **Password**: secret_sauce	It should redirect to the home page the products section	It redirects to the home page products section
TC_02	Login	Functional (Negative Testing)	Verify if the login is unsuccessful with other credentials	1. Go to the URL: SauceDemo 2. Fill the username and Password field. 3. Click on login button	**Usernames**: standard_user 1, standard_user 2 **Password**: secret_sauce, secret_sauce2	It should throw an error	It throws an login error
TC_03	Login	Functional (Negative Testing)	Verify if the username case sensitivity exists during login	1. Go to the URL: SauceDemo 2. Fill the capitalization username and Password field. 3. Click on login button	**Valid username:** standard_user **Test username:** Standard_user **Password:** secret_sauce	It should reject the login attempt	It rejects the login attempt
TC_04	All Items	Functional	Verify if the users can add and remove a product from cart	1. Go to the URL: SauceDemo 2. Fill the username and Password field. 3. Click on login button 4. Click the add to cart button. 5. Click remove button	**Uername**: error_user, problem_user **Password**: secret_sauce	It should remove the product for the cart	It failed to remove the product from the cart

TC_05	All Items	Functional	Verify if the users can add and remove a product from cart	1. Go to the URL: SauceDemo 2. Fill the username and Password field. 3. Click on login button 4. Click the add to cart button. 5. Click remove button	**Uername:** standard_user, performance_glitch_user, visual_user **Password:** secret_sauce	It should remove the product for the cart	It able to remove the product from the cart
TC_06	Cart	Functional/ Session management	Verify the state of the cart and session persistence between different users	1. Go to the URL: SauceDemo 2. Fill the username and Password field. 3. Click on login button 4. Click the add to cart button. 5. Click logout button 6. Login again	**Usernames**: standard_user, locked_out_user, problem_user, performance_glitch_user, error_user, visual_user **Password**: secret_sauce	The cart should show the products that the user added on their last session	Fail: The cart items persist when user switches. A user sees the item added by another user
TC_07	All products	UI	Verify if the images are correct for the item or not	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button 4. Verify the images	**Usernames**: standard_user, locked_out_user, performance_glitch_user, error_user, visual_user **Password**: secret_sauce	It should show the correct images of the product in the home page	It shows the correct item products
TC_08	All products	UI	Verify if the images are correct for the item or not	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button	**Usernames**: problem_user **Password**: secret_sauce	It should show the correct images of the product in the home page	It shows same image for all products

				4. Verify the images			
TC_09	All products	UI	Verify if the UI elements are in correct position	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button	**Usernames**: standard_user, locked_out_user, problem_user, performance_glitch_user, error_user **Password**: secret_sauce	All the Ui elements should be in correct position	All the UI elements are in correct position
TC_10	All products	UI	Verify if the UI elements are in correct position	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button	**Usernames**: visual_user **Password**: secret_sauce	All the Ui elements should be in correct position	The cart logo should appear at the top left but appear in the wrong position.
TC_11	Login	Non-Functional	Verify if the performance is acceptable for login	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button	**Usernames**: standard_user, locked_out_user, problem_user, error_user, visual_user **Password**: secret_sauce	The time should be acceptable	It takes reasonable time
TC_12	Login	Non-Functional	Verify if the performance is acceptable for login	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button	**Usernames**: performance_glitch_user **Password**: secret_sauce	The time should be acceptable	It takes unnecessary login time
TC_13	ALl Products	Functional	Verify if the user can add as many products as they want	1. Go to the URL: SauceDemo 2. Fill the username and Password field.	**Uername:** standard_user, performance_glitch_user, visual_user **Password:** secret_sauce	They should be able to add as many products as they want	They can add as many products as they want

				3. Click on login button 4. Click the add to cart button.			
TC_14	ALl Products	Functional	Verify if the user can add as many products as they want	1. Go to the URL: SauceDemo 2. Fill the username and Password field. 3. Click on login button 4. Click the add to cart button.	**Uername**: error_user, problem_user **Password**: secret_sauce	They should be able to add as many products as they want	They cannot can add as many products as they want
TC_15	Your cart	Functional	Verify if the users can generate their checkout pfd	1. Go to the URL: SauceDemo 2. Fill the username and Password field. 3. Click on login button 4. Click the add to cart button. 5. Click on the cart icon. 6. Click on the checkout. 7. Fill up the First, Last names section and Zip code. 8 Click on continue. 9. Click on Finish. 10.Then click Generate PDF order..	**Uername**: standard_user, performance_glitch_user, visual_user **Password**: secret_sauce	They should be able to generate a pdf of their checkout	They are able to generate a pdf of their checkout
TC_16	Your cart	Functional	Verify if the users can generate their checkout pfd	1. Go to the URL: SauceDemo 2. Fill the username and Password field.	**Uername**: problem_user, error_user **Password**: secret_sauce	They should be able to generate a pdf of their checkout	They are not able to generate a pdf of their checkout

				3. Click on login button 4. Click the add to cart button. 5. Click on the cart icon. 6. Click on the checkout. 7. Fill up the First, Last names section and Zip code. 8 Click on continue. 9. Click on Finish. 10.Then click Generate PDF order..			
TC_17	About	UI	Verify if the users can see the about section contents	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button 4. Go to the About section.	**Usernames**: standard_user, problem_user, performance_ glitch_user, error_user, visual_user **Password**: secret_sauce	All users should see the about section contents	No user can see the about section contents
TC_18	Dynamic catalog	Functional	Verify if the users can see view products from dynamic catalog	1. Go to the URL: SauceDemo 2. Fill the username and Password field with the given credentials. 3. Click on login button 4. Go to the Dynamic catalog. 5. Try to click on any products.	**Usernames**: standard_user, problem_user, performance_ glitch_user, error_user, visual_user **Password**: secret_sauce	All users should view Dynamic catalog products	No one can view the products from the Dynamic catalog. Complete static products
TC_018	Dynamic catalog	UI	Verify if the users do not see	1. Go to the URL: SauceDemo	**Usernames**: standard_user, problem_user,	All users should view	It shows duplicate products

			duplicate products	2. Fill the username and Password field with the given credentials. 3. Click on login button 4. Go to the Dynamic catalog. 5. Go to Lazy Load.	performance_ glitch_user, error_user, visual_user **Password**: secret_sauce	unique products	when scrolling down.

Risk Assessment

- The areas where it most likely fails,
    - **Cross-User Session**: It will fail to persist the users cart state and show the wrong users and their wrong cart state.
    - **Infinite scroll:** It fail in Dynamic catalog lazy load section where it stucks in an infinite loop of displaying products
    - **UI Stability:** The UI is not stable for specific user.
    - **Cart management:** For some users it cannot add some specific products, and also do not allow them to add products more than three. They cannot even remove when they add the products.
